Excellence in safety services

NovaMarine plays a vital role in providing support, service and repairs, rescue and survival equipment to the marine market.

Offering 24-hour assistance at major ports, we strive to ensure that the safety requirements of your vessel and crew are always met.

Our internationally trained service engineers at our accredited maintenance stations are on hand to undertake the mandatory annual maintenance of your life rafts and lifeboats. Purchase and rental options are also available to keep your vessel fully compliant at all times.

In addition, NovaMarine can further satisfy your safety requirements with a range of firefighting equipment that includes the servicing and sale of all types of fire extinguishers, as well as a range of pyrotechnics for your vessel and life rafts.

We send our technicians on international training to ensure that they are kept up to date with new advances and technologies in the marine safety sector.

NovaMarine is an approved SANAS high pressure inspection and testing station. This includes the testing and refilling of CO₂ cylinders.

Calibration

NovaMarine have opened a calibration division to complement its fire, survival and technologies service offering to our customers. With limited downtime, we provide precision on-site calibration, diagnostics and repairs with our highly skilled and experienced technical staff that will meet industry standards.

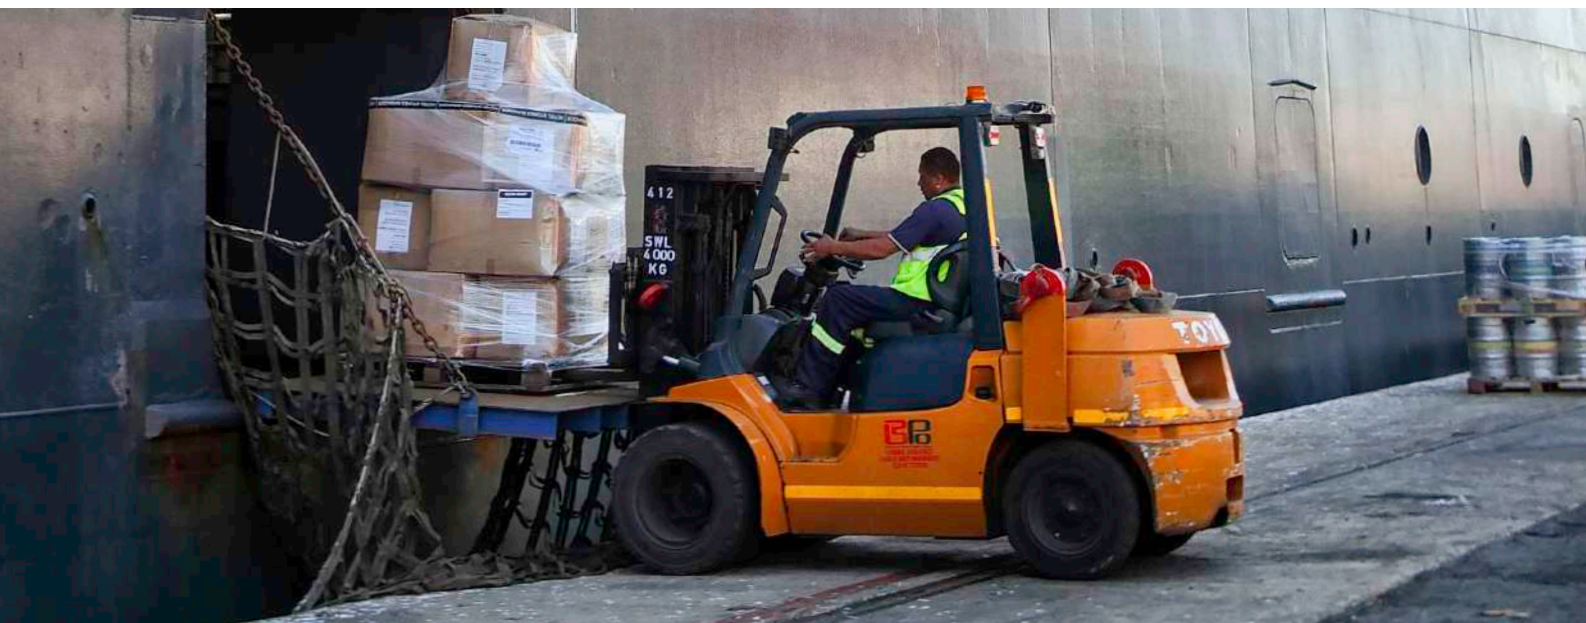

Our technicians work in accordance with our ISO 9001:2015 quality management system and to OEM specifications. We are able to offer offshore calibration, equipment sales as well as 24/7, after sales servicing and support to our customers.

Chandling

NovaMarine chandling acts as a supplier of provisions and related supplies to the shipping industry. We pride ourselves on our reliability and the efficiency of our experienced staff, who are here to make the chandling experience a pleasant "hassle-free" one.

We collect and deliver to and from vessels in port and we also have our own crane services. Situated in Paarden Eiland, the company is close to the harbour and can provide fast and reliable service.

As a ship chandling specialist we can provide supplies and equipment for ships, yacht owners and general dealers. From your everyday consumables to parts for your ship, we either stock the product or can source it accordingly. As an established chandling company with many years of experience, we can assist you with all your victuals.

Fire safety

Our fire safety division is well furnished with high-tech equipment that enables us to service various types of fire fighting products.

The well-trained fire service division staff have the technical knowledge necessary to maintain your equipment to the highest standards. All of our work is performed under the SABS mark of approval.

FIRE SAFETY AGENTS

We are the sole service and distribution agents for Sea-Fire and offer a wide range of their products, which are approved by various marine classification societies.

Filled with FM200, most Sea-Fire products pose less of a health risk to users - unlike many other gasses currently used in fixed fire installations and portable fire extinguishing units.

SANAS certification allows us to test and refill high pressure gas cylinders. We have a fully equipped and approved station.

Survival

Sales and service of safety equipment, immersion suits, life jackets, electronic equipment and marine safety equipment.

Lifeboats

Our lifeboat / rescue boat division is well equipped and has the facilities available for the refurbishing and servicing of lifeboats, inflatable boats, davits and fast rescue craft.

To ensure that we offer the highest quality in repairs, we have had our engineers trained internationally by more than 20 lifeboat and davit manufacturers.

Our engineers are available 24/7 in order to meet your needs within our area of coverage across all of Africa's ports.

SERVICE OFFERINGS

Inflatable rescue boats, rigid rescue boats / fast rescue craft, work boats, on and off load release hooks on rescue boats and lifeboats, free fall davits and gravity hinge davits.

SCOPE OF SERVICES INCLUDE

- Annual inspections
- 5 yearly overhauls
- Dynamic winch brake testing
- Static load testing
- NDT testing
- GRP repairs
- Refurbishing of interior and exterior
- Pressure testing / overhaul of air supply cylinders
- Load testing

The NovaMarine legacy

NovaMarine was the first multi-manufacturer approved lifeboat and davit service provider in Africa.

We are approved by a number of manufacturers across the globe to give you, the customer, the best service at all times. As a world-class service provider we cover all the major ports in Africa.

Life rafts

Our life raft division is equipped with all of the necessary equipment to service and repair a large variety of commercial and leisure life rafts, life jackets and immersion suits.

The following servicing can be carried out at our facilities:

- Davit test
- Nap test
- Gas test
- Floor seam test
- Replacement of all Timex items
- Hydrostatic release test
- Inflatable life jacket inspections and renewal of Timex items
- All documentation including customs and certification

SERVICING STANDARDS

To ensure that your life raft is properly serviced, a strict quality procedure is followed.

Testing is undertaken in accordance with the manufacturer's specifications and to various international regulations and standards.

We collect and deliver your life rafts, life jackets, immersion suits to and from the vessel.

We will provide you with a minimum requirements list of safety equipment that you will need for the inspection of your leisure craft, and deliver before inspection date.

Technologies

NovaMarine Technologies specialises in the procurement, installation and commissioning of auxiliary marine systems for internationally recognised Original Equipment Manufacturers (OEM's) such as Gefico, Cathelco, SKF and Daihatsu. Our technicians have been trained to conduct diagnostic checks as well as perform servicing and repairs on OEM units.

Offshore

ACCREDITED AND EQUIPPED

NovaMarine is a multi-manufacturer approved company specialising in the servicing of lifeboats, fire equipment and davits on board your vessel or rig. Our technicians are certified and trained to international standards and are ready to travel to any port in Africa at short notice. Our clients have come to know that our highly qualified teams deliver service excellence, safety satisfaction and 100% focus at all times. We understand the importance of effective, operational practices.

NovaMarine are constantly growing their capabilities and their reach in order to support your safety objectives. This allows us to offer the extensive and professional services from servicing and inspection to maintenance and repairs. No matter what your requirements are, NovaMarine can ensure that you remain compliant with regulatory requirements.
